For more information, please visit the Hydrasearch Co website to explore their full product range. Additionally, the experts at Chief Fluid Systems are available to assist with your Underway Replenishment enquiries.

MILITARY MARINE RUBBER HOSE PRODUCTS

MIL-SPEC RUBBER HOSE, REUSABLE FITTINGS, ELBOWS, & ADAPTORS

Operating in this field for well over a decade, Chief Fluid Systems are specialists in the manufacture, supply, and repair of a wide variety of Military Specification rubber hose assemblies for Marine & Naval requirements utilising certified Hydrasearch Co. parts. Typically used on systems that require a certain level of shock resistance due to their level of flexibility, they can also be found in other applications such as sound attenuation, fuel conveyance, and general use in fresh or sea water systems.

In comparison to traditional permanently crimped rubber hose assemblies, these specialized hose assemblies can be disassembled, repaired, and reassembled by sailors onboard the ship. This is particularly critical in operational environments, times of combat readiness, or when the ship is at sea for long periods of time away from port.

MILITARY AEROSPACE RUBBER HOSE PRODUCTS

MK41 V.L.S. (VERTICAL LAUNCH SYSTEM) DELUGE HOSE ASSEMBLIES

As the only approved and certified manufacturer in Australia of the MK41 V.L.S. Deluge hose assemblies, Chief Fluid Systems has been a trusted supplier of these specialised hose products to the Royal Australian Navy for well over a decade.

Utilising Hydrasearch Co. qualified end couplings, these hose assemblies are certified and in full compliance with the appropriate Military Specifications and NAVSEA requirements.
