

**PepperBall®**

# **EXECUTIVE OVERVIEW**

FEBRUARY, 2024

# WHY PEPPERBALL®?

As use of force policies are becoming more restrictive and officers are being expected to use the least amount of force necessary to resolve situations; jurisdictions are looking for alternatives to not only lethal force but more damaging forms of less lethal force. The PepperBall® legacy is in providing non-lethal law enforcement solutions that prioritize officer safety, community relations, and **reduce the likelihood of lethal force**. Our mission? **To save lives.**

The PepperBall system, which includes powerful and accurate launchers as well as versatile and effective projectiles, enables law enforcement officers to respond to a wide array of scenarios more safely and effectively. With an effective range of up to 150 feet, PepperBall provides officers with **increased distance and time** to make critical decisions, and the design and functionality of our products are intended to work in challenging situations where other tools may not be as effective.

Our commitment is not limited to just design and functionality. We have also made significant efforts to expand our product range and improve our market reach, both in the U.S. and internationally. The company has made strategic personnel changes to support and drive growth, responding to the increasing demand for non-lethal solutions as law enforcement agencies continue to embrace reform and move towards de-escalation strategies.

The strategic appointments and expanded investment underscore PepperBall's dedication to offering the best non-lethal de-escalation solutions. PepperBall products have been proven effective in changing behavior, enabling compliance at a safe distance, and creating a safe buffer zone that protects both officers and citizens. This aligns with our commitment to provide non-lethal, effective, and versatile solutions that **prioritize the safety of both the public and law enforcement officers.**

# PEPPERBALL® PRODUCT LINEUP: LAUNCHERS

## PEPPERBALL® LAUNCHERS

TRP™

TAC-SA™ and TAC-SA™ PRO PLUS™

PPC™ and PPC Breacher™

FTC PRO™ and FTC PRO PLUS™

VKS PRO™ and VKS PRO PLUS™

VK-SBL™

BLAST™ and  
BLAST-GB™

Launchers are the primary tools used for deploying PepperBall projectiles. The range includes:

- TRP™: A lightweight launcher with a quick response system, ideal for rapid engagement.
- VKS PRO™\*: A multi-payload, semi-automatic launcher that allows adjustable kinetics, suitable for various operational needs.
- TAC-SA PRO™\*: Designed for high-intensity engagement, perfect for patrol or intense scenarios.
- FTC PRO™\*: Known for its reliability and accuracy, this launcher is the industry standard for corrections and crowd control.
- PPC™: A lightweight and portable option, providing patrol officers with an easy-to-operate non-lethal tool. Also available in a dedicated glass-breaker configuration.
- PepperBall BLAST™: An effective short-range solution that delivers a powder payload, ideal for law enforcement and corrections operations. Also available in a dedicated glass-breaker configuration.

\*Products also available in a PRO PLUS version with enhanced optics and accessories.

## PEPPERBALL PRODUCT LINEUP PROJECTILES

### PEPPERBALL® PROJECTILES

#### **LIVE™** **2% PAVA**

The basic PepperBall projectile. Excellent for direct impact and area saturation in interior spaces.

#### **LIVE-X™** **5% PAVA**

Includes a more potent and powerful concentration of PAVA. Ideal for crowd management and barricade operations.

#### **LIVE-MAXX™** **5% MAXSAICAN**

Made from a proprietary process that produces more airborne PAVA, that allows for more irritant inhalation, delivering an ultra high potency effect.

#### **INERT™** **SCENTED POWDER**

Containing a harmless powder, this projectile is best suited for training and direct impact when PAVA exposure is not desired.

#### **MARKING** **PAINT SOLUTION**

Can be used to mark suspects for later apprehension, marking doors, openings, and/or objects for identification.

#### **GLASS BREAKING** **SOLID POLYMER**

Used for breaking out residential windows and automobile glass. Not for use on humans or animals.

**VXR projectiles** are fin-stabilized and provide more accuracy and greater effective range than round projectiles.

#### **VXR™ LIVE-X™** **2.5% PAVA**

#### **VXR™ LIVE-MAXX™** **5% MAXSAICAN**

#### **VXR™ INERT™** **SCENTED POWDER**

#### **VXR™ MARKING** **PAINT SOLUTION**

PepperBall projectiles are known for their accuracy and effectiveness. We offer a variety of projectiles that can be used depending on the scenario, including PAVA rounds, INERT and practice rounds, VXR extended range rounds, and specialty rounds such as glass breaking and marking.
